SUMMARY

A highly motivated and enthusiastic software developer specializing in front-end and full-stack development, with a strong foundation in JavaScript.

EXPERIENCE

Software Application Developer

Sep 2024 - PRESENT

- I secured a freelance position as a software application developer, where I am building an e-commerce app called B-Connect using React Native.

Open Source Developer at Timechain Labs [Internship]

Jul 2024 - Sep 2024

- Collaborating with a team to develop and contribute to real-world blockchain projects.
 - Gaining hands-on experience in blockchain technology, smart contract development, and distributed ledger systems.
-

PROJECT

B-Connect ECom

Sep 2024 - PRESENT

- An e-commerce mobile application developed using React Native, with seamless Tally ERP integration to manage product data and transactions effectively.
- The app offers a comprehensive platform for users to browse products, place orders, and track purchases in real-time.

Class Crew

Mar 2024 - Jun 2024

- An educational platform developed using the MERN stack, offering two core features: a study timer and career exploration.
- The study timer allows users to efficiently schedule their tasks, while the career path finder provides personalized career recommendations based on user interests and skills..

PyGarden

Jun 2024 - Jul 2024

- Developed a Python-based application for managing a virtual garden using Object-Oriented Programming (OOP) principles.
- Designed and implemented classes for plants and gardens, enabling functionalities such as adding new plants, watering plants based on their specific needs etc.

Personal Recipe Book

Aug 2024 - PRESENT

- Developed a React application for managing personal recipes, allowing users to add, view, and delete entries with detailed information, including ingredients and instructions.
- Leveraged MongoDB for data storage and management and implemented RESTful APIs to ensure smooth communication between the frontend and backend.

Dhara-TSOC

Aug 2024 - Sep 2024

- A supply chain financing application focused on delivering a pixel-perfect user experience, with the front-end successfully developed using SvelteKit.

- Developed a dynamic and immersive music application using JavaScript, designed to provide users with a rich and engaging auditory experience.
 - The app seamlessly combines advanced technology with an intuitive user interface, allowing users to discover curated playlists, personalize their music journey.
-

EDUCATION

Bachelor of Commerce with Computer Application

Sep 2021 - Jul 2024

Mangalore University - Bhandarkar's Arts and Science College, Kundapura

- Balanced knowledge of business principles and practical tech skills.
- Skilled in developing efficient and innovative software solutions using computer applications.

II Pre-University College

Jun 2019 - Apr 2021

- Specialization in Business Economics and Accountancy.

74.5%
